REPORT DATE: March 17, 2009

TEST REPORT

CUSTOMER: Coin Hopping Games
11714 Farmland Drive
Rockville, MD 20852
USA

Attn: Joan Cartier

Product Name: Coin Hopping Washington DC Board Game
Age labeling: 8 +
Age grading: 8 +
Supplier: Color Magic
Sample received date: March 10, 2009
Date of testing ended: March 17, 2009

TEST CONDUCTED:

AS REQUESTED BY THE APPLICANT, FOR DETAILS REFER TO ATTACHED PAGE(S)

CONCLUSION:

<u>Tested Samples</u>	<u>Standard</u>	<u>Result</u>
Coin Hopping Washington DC Board Game	1. Total Lead in Substrate	1. Below the Limits
	2. 16 CFR 1303 Lead in Surface Coating	2. Does Comply

(1) Chemical Analysis: Total Lead in Substrates (Composite)

Procedure: Acid digestion per **EPA 3050B/3051** was used and the total lead content was determined by Inductively Coupled Argon Plasma Spectrometry.

Requirement: The lead content shall not exceed 600 ppm of any part of the product as required by the **Consumer Product Safety Improvement Act of 2008 (CPSIA 2008)**.

However, as of August 14, 2009, the limit for total lead content will be lowered to 300 ppm.

Sample Utilized: Complete Product Digested

Test Results:

Parameter	Results (ppm)				Limit (ppm)
	1	2	3	4	
Total Lead	<10	<10	<10	<10	600

Component	Description
1	Composite red, blue, yellow, and black from cards and game board, rules sheet, including black on bottom game board
2	Composite red, blue, green, and yellow chip
3	Composite yellow, green, and red pawn
4	Composite blue bag blue string on blue bag

Note: In order to determine and report a definitive conclusion, separate colors must be tested. Composite testing is not permitted as per the Consumer Product Safety Improvement Act of 2008.

Conclusion: When tested as specified, the submitted composite sample results are **below** the limits set forth in the **Consumer Product Safety Improvement Act of 2008 (CPSIA 2008/H.R. 4040)**, Title I, Section 101 for total lead content in substrates.

(2) Chemical Analysis: Total Lead (Surface Coating)

Procedure: Analysis of the surface coating/wet paint was performed by *Inductively Coupled Argon Plasma Spectroscopy* to determine compliance with **16 CFR 1303**.

Requirement: The lead content shall not exceed 600 ppm of the dried paint film as required by **16 CFR 1303**.

However, as of August 14, 2009, the limit for total lead content will be lowered to 90 ppm in accordance with the Consumer Product Safety Improvement Act of 2008 (CPSIA).

Sample Utilized: Coating Removed from Product

Test Results:

	Results (ppm)	Limit (ppm)
	1	
Total Lead	<10	600

Component	Description
1	Coating on black back and top of board

Conclusion: When tested as specified, the submitted sample **does comply** with 16 CFR 1303/CPSIA Section 101(f) requirements.
